(54) IC-MOUNTED CARD BASE MATERIAL, IC-MOUNTED INDIVIDUAL IDENTIFYING CARD AND ITS MANUFACTURING METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a base material for an IC card which eliminates the deformation of the card, improves printing performance for a thermal transfer recording medium, etc., improves the penetration of chemicals, water, etc., from a card edge and improves the durability of the card, and to provide an IC-mounted individual identifying card using it, and an IC-mounted individual identifying card manufacturing method.

SOLUTION: This IC-mounted card base material which has an electronic component of specific thickness between a 1st sheet member and a 2nd sheet member and also has a cushion layer made of an activated light ray setting resin on at least one sheet member.
